Just thought I would let you guys at vans know that C_FLHO is now in the air. The hobs has 32 hours on it and hasn't had any problems. The airplane flies hands off with no adjustments. The airplane was built by Ryan's RVs right here in Gravelburg Canada, now based in Medicine Hat, Alberta.

So any local RV guys come by and say Hi so I have some flying buddies. The dash has a trutrak II auto pilot, dynons, and a gamin stack. The engine is a aerosport io360 with inverted oil and fuel for those upside down days, which I'm still working on! The airplane was test flown by in the famous Dennis Bourgeios, this guy has flown crop dusters for years and has tons of hours. He also helped build the plane with his son Ryan. I highly recommend them to anyone who would like to have them build an RV.

Thanks Vans for a great plane.
