

Greetings all:

I am happy to report another MN RV took to the skies for the first time this morning. Larry Mills recently finished his RV-6 and yours truly made the first flight today. Power is a 180 hp Aerosport with Hartzell's blended airfoil prop (BTW, this was one SMOOTH engine/prop arrangement ran like an electric motor. A few minor issues to resolve but this will be a great airplane for Larry. Right now, I am giving him dual in another RV-6 getting him ready to fly his own.

A fun morning!!

Doug

PS. Larry's airplane was painted all white by Modern Auto in Plymouth and Larry (who is in the graphic design business) designed the vinyl graphic layout.
