

Subject: First Flight! My baby is born!

Dear friends and family,

After 11 months of work my new plane took to the skies this morning. The plane is a Vans RV-7A with an AeroSport IO-360 180HP engine. The instrumentation is ultra high tech and all weather capable, built by Fabian Leffler. The beautiful paint job was designed by me, and applied by Scott Wyrock.

While I only flew for about 1 hour today, the performance is awesome. The plane will cruise at 200 mph!

I hope to get in lot's of flying in the near future, and would like to stop to visit many of you who are out of state.

Best regards,

Garry
